# Introduction

## **WHAT THIS CUMULATIVE INDEX IS**

This publication is a cumulative index to the abstracts contained in NASA SP-7011 (73) through NASA SP-7011 (84) of *Aerospace Medicine and Biology: A Continuing Bibliography*. NASA SP-7011, by means of supplements, serves as a current abstracting and announcement journal for references on bioscience and biotechnology. It has been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA), and the National Aeronautics and Space Administration (NASA).

Entries prepared by the two contributing organizations are identified as follows:

1. NASA entries by their STAR accession numbers (N70-10000 series);
2. AIAA entries by their IAA accession numbers (A70-10000 series);

## **HOW THIS CUMULATIVE INDEX IS ORGANIZED**

This Cumulative Index includes a subject index, a personal author index and a corporate source index.

## **HOW TO USE THE SUBJECT INDEX**

Two types of cross-references appear in the subject index:

1. Use (U) references indicate that the subject term is not "postable," i.e., not a valid term, and that the following term or terms are used instead. For example:

COLUMBIUM

U NIOBIUM

ANNULAR JETS

U ANNULAR FLOW

U JET FLOW

2. Narrower Term (NT) references refer the user to more specific headings in the same subject area, under which additional material on the subject may be found.

For example:

EMISSION

NT ELECTRON EMISSION

NT NEUTRON EMISSION

NT THERMAL EMISSION

In addition, a searcher may use the notations of content in the index to narrow further his quest for particular items. This is because subject terms can readily include more than one class of document. For example:

BIOLOGICAL EFFECT

Vibratory force effect upon  
biological systems, particularly  
human organism.

Biological effect of cosmic and  
solar radiations on human  
body at high altitudes.

illustrates a case where two references on different topics are listed under the same subject term.

### HOW TO USE THE PERSONAL AUTHOR INDEX

All personal authors used in the abstract-section citations in the individual Supplements appear in the index. Differences in transliteration schemes may require multiple searching of the index for variants of an author's name. For example:

EMELIANOV, M.D.

and

YEMEL'YANOV, M.D.

### HOW TO USE THE CORPORATE SOURCE INDEX

The corporate source index entries are abridged versions of the corporate sources used in the abstract-section citations in the individual Supplements. The corporate source supplementary (organizational component) does not appear in the index. For example:

NEW MEXICO STATE UNIV., LAS CRUCES, DEPT. OF BIOLOGY

(Corporate source at citation)

NEW MEXICO STATE UNIV., LAS CRUCES.

(Corporate source index entry)

### IDENTIFICATION OF DESIRED SUPPLEMENT

The abstract and descriptive cataloging for any accession number selected from the indexes may be found in the appropriate Supplement. The *Accession Number Ranges* table showing the ranges of accession numbers (N70-10000 and A70-10000) contained in each Supplement appears on the inside front cover of this index. Once the range of accession numbers containing the selected accession number is found in this table, the desired Supplement number is given in the left-hand column of the table. For example:

N70-21130 was announced in Supplement 77.

# AVAILABILITY OF DOCUMENTS

## Availability of this Bibliography

Copies of *Aerospace Medicine and Biology* (NASA SP-7011) and its supplements are available to the public from the National Technical Information Service, Springfield, Virginia 22151, for \$3 each. Copies are available on initial distribution without charge to the following:

1. NASA Offices, Centers, contractors, subcontractors, grantees, and consultants;
2. Other U.S. Government agencies and their contractors;
3. Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public use;
4. Other organizations in the United States having a need for NASA documents in work related to the aerospace program; and
5. Foreign government or academic organizations that have established appropriate reciprocal arrangements with NASA.

## STAR Entries (N70-10000)

### Availability of NASA Documents

NASA documents are identified by an asterisk following the accession number in the abstract sections of the supplements. NASA documents that have been microfiched<sup>(1)</sup> (identified by the # sign) are available on microfiche without charge to an organization eligible to receive *Aerospace Medicine and Biology* without charge.

### Availability of Non-NASA Documents

Non-NASA documents are those documents that do not carry an asterisk following the accession number. Department of Defense documents (identified by the "AD" number in the citation and indexes) are available, subject to a service charge, in hard copy or microfiche from the National Technical Information Service, Springfield, Virginia 22151. Microfiche copy of DOD reports are available to Defense Documentation Center, Cameron Station, Alexandria, Virginia 22314. National Lending Library (NLL) for Science and Technology translations are available from NLL at the price stipulated in the citation. Requests for purchase should be addressed to:

National Lending Library for Science and Technology  
Boston Spa, Yorkshire, England.

Dissertations selected from Dissertation Abstracts are available in xerographic copy and on microfilm for sale from University Microfilms, Inc., Ann Arbor, Michigan, 48106. All requests should cite the author and Order Number as they appear in the citation. Note that the dissertations are provided on microfilm and not microfiche.

Other non-NASA documents are publicly available as indicated in the citation. Those documents which have been microfiched are available on microfiche without charge only to NASA Offices, Centers, contractors, subcontractors, and consultants.

### How to Obtain Microfiche

If you are registered with NASA and eligible to receive reports as described above, send the completed *Document Request* (Facility Form 492) to:

NASA Scientific and Technical Information Facility  
P.O. Box 33  
College Park, Maryland 20740

(1) A microfiche is a transparent sheet of film, 105 x148 mm in size, capable of containing up to 72 pages of information reduced to micro images (not to exceed 20:1 reduction).

If you are not registered with NASA and wish to receive information concerning registration, request *Registration Form—Technical Publications* (Facility Form 713) from the NASA Scientific and Technical Information Facility at the address given above. Others may obtain microfiche copies by purchase from:

National Technical Information Service  
(NTIS)  
Springfield, Virginia 22151

#### **U.S. Government Sales Agencies**

Publications with a NTIS availability statement in the citation are sold in hard copy and microfiche copy by:

National Technical Information Service  
(NTIS)  
Springfield, Virginia 22151

The following unit price has been established by NTIS: \$3.00 for hard copy, \$0.95 for microfiche.

Publications with a SOD availability statement in the citation are sold in hard copy by:  
Superintendent of Documents, U.S. Government Printing Office (SOD)  
Washington, D.C. 20402

NASA documents available from the SOD are also available from NTIS at the SOD price given in the citation.

NOTE: Documents announced without specific availability statement may be requested from the issuing activity.

Bibliographic information, e.g., report number, etc., rather than the NASA accession number (i.e., N70-12345), should be provided when requesting a document from other than NASA.

#### **IAA Entries (A70-10000)**

All cited documents are available from the AIAA Technical Information Service as follows: Paper copies are available at \$5.00 per document up to a maximum of 20 pages. The charge for each additional page is \$0.25. Microfiche are available at the rate of \$1.00 per microfiche for documents identified by the symbol # following the accession number. A number of publications, because of their special characteristics, are available only for reference in the AIAA Technical Information Service Library. Minimum air-mail postage to foreign countries is \$1.00.

Please refer to the accession number, e.g., A70-13193, when requesting documents. Address all inquiries and requests to:

Technical Information Service  
American Institute of Aeronautics and Astronautics, Inc.  
750 Third Avenue, New York, N.Y. 10017

For further details please consult the *Introductions* to *STAR* and *IAA*, respectively.

## Typical Subject Index Listing

### ELECTROMAGNETIC NOISE

The Notation of Content (NOC), rather than the title of the document, is used to provide a more exact description of the subject matter. The NASA or AIAA accession number is included in each entry to assist the user in locating the abstract in the abstract section of an individual issue of *Aerospace Medicine and Biology*. If applicable, a report number is also included as an aid in identifying the document.
